

# Corporate Organizations

# What is a corporate?

- A business created legally and registered by the government
- Separate from owners; company = “legal person.”
- Can own property, sign contracts, sue & be sued.
- Owned by shareholders but managed by a Board of Directors.
- Allows continuity beyond individual owners.

# How Corporates Work Daily

- Corporates = not just big names → they're workplaces
- Thousands of employees doing tasks every day
- To stay organized, they depend on tools & technology
- From attendance to meetings → everything runs on tools

# Why Tools Matter

- Tools make corporate life faster & easier
- Improve communication, security & record-keeping
- From biometrics to Wi-Fi → tools keep offices alive
- Without them = office chaos 🤬

# Biometric System

- Uses fingerprints, face, or iris for attendance
- Prevents misuse & buddy-punching
- Adds security by restricting access
- Common at entrances & secure zones

# Photocopy Machine

- Quick copies of documents & reports
- Saves time in meetings, training & legal work
- Still important even in digital offices
- Essential for day-to-day paperwork

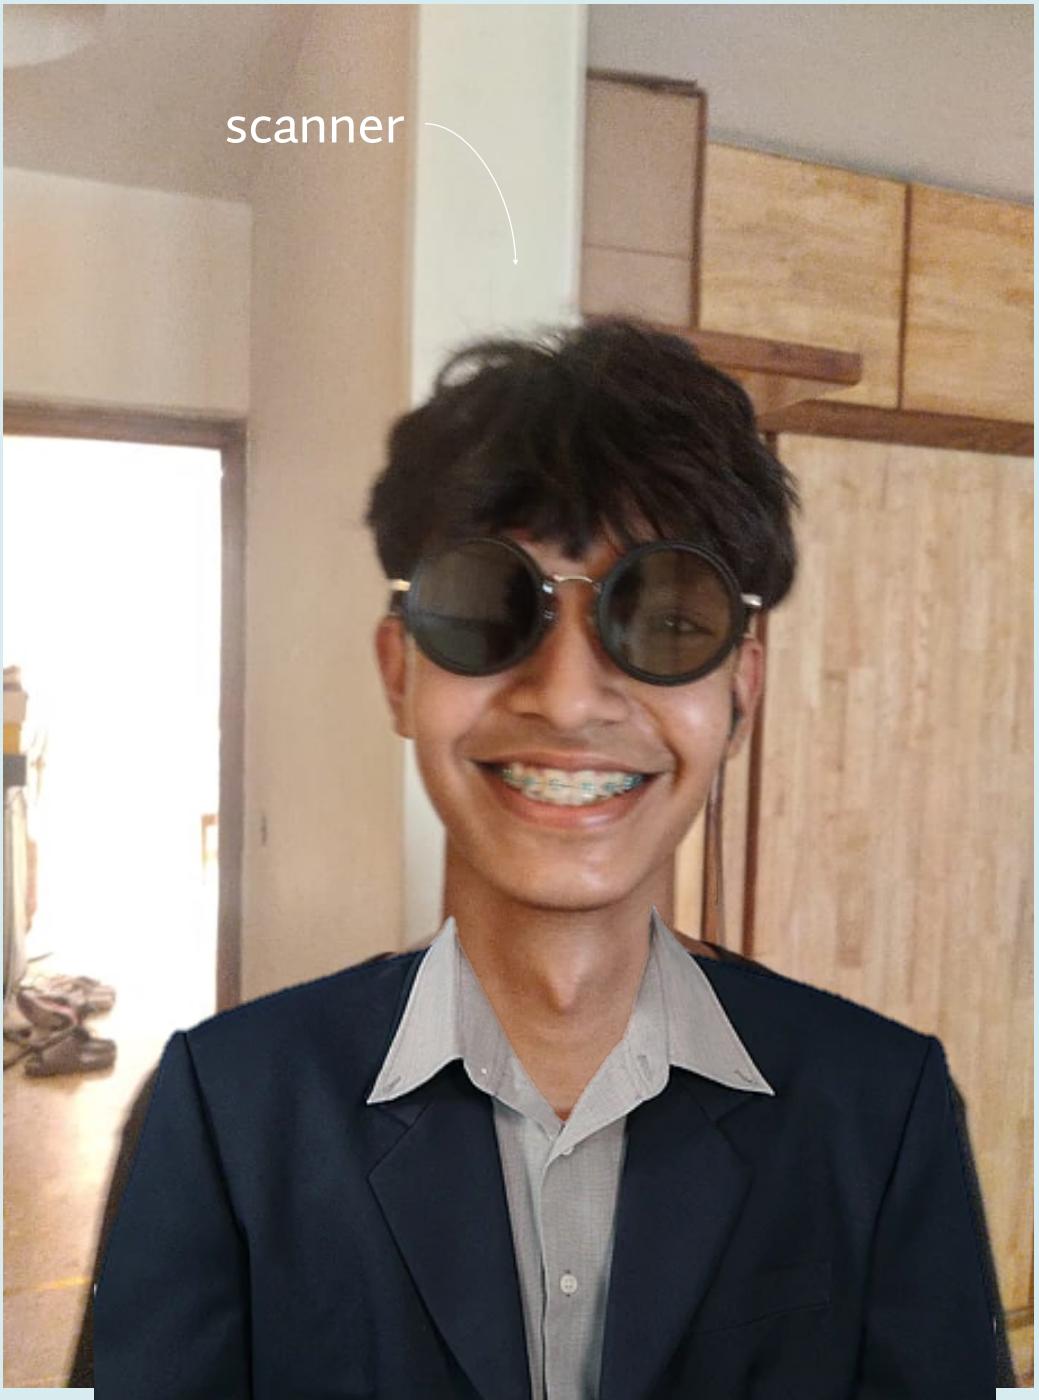

this is how a photocopy works

# LED Projector

- Projects presentations, charts & videos
- Makes meetings interactive & clear
- Useful for sales pitches, strategies & training
- Supports strong visual communication

# Scanners

- Converts paper → digital format
- Easy to share via email or cloud
- Reduces paper waste, eco-friendly
- Keeps permanent digital records

# Laptops

- Backbone of modern corporate work
- Create docs, analyze data, run software
- Portable → work from home, travel, meetings
- Boosts flexibility & productivity

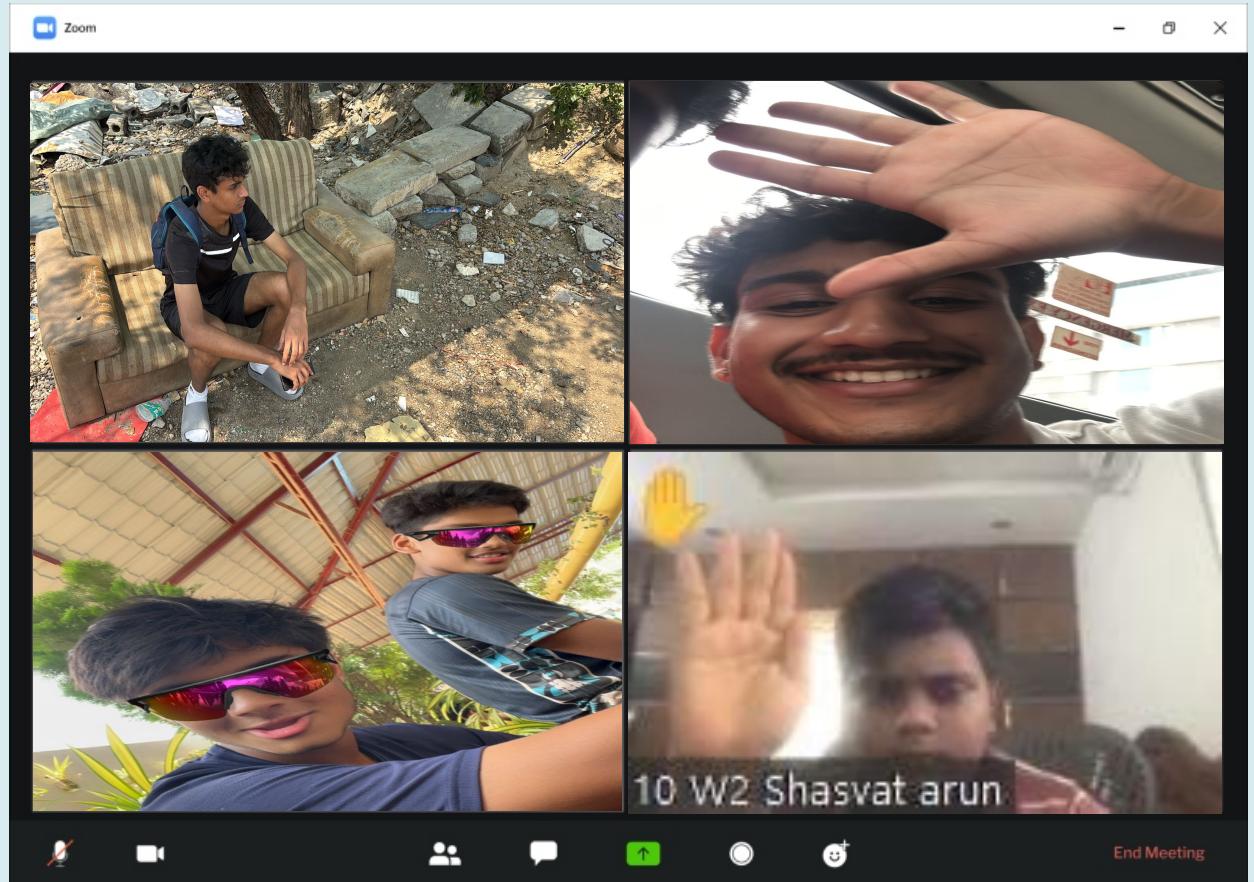

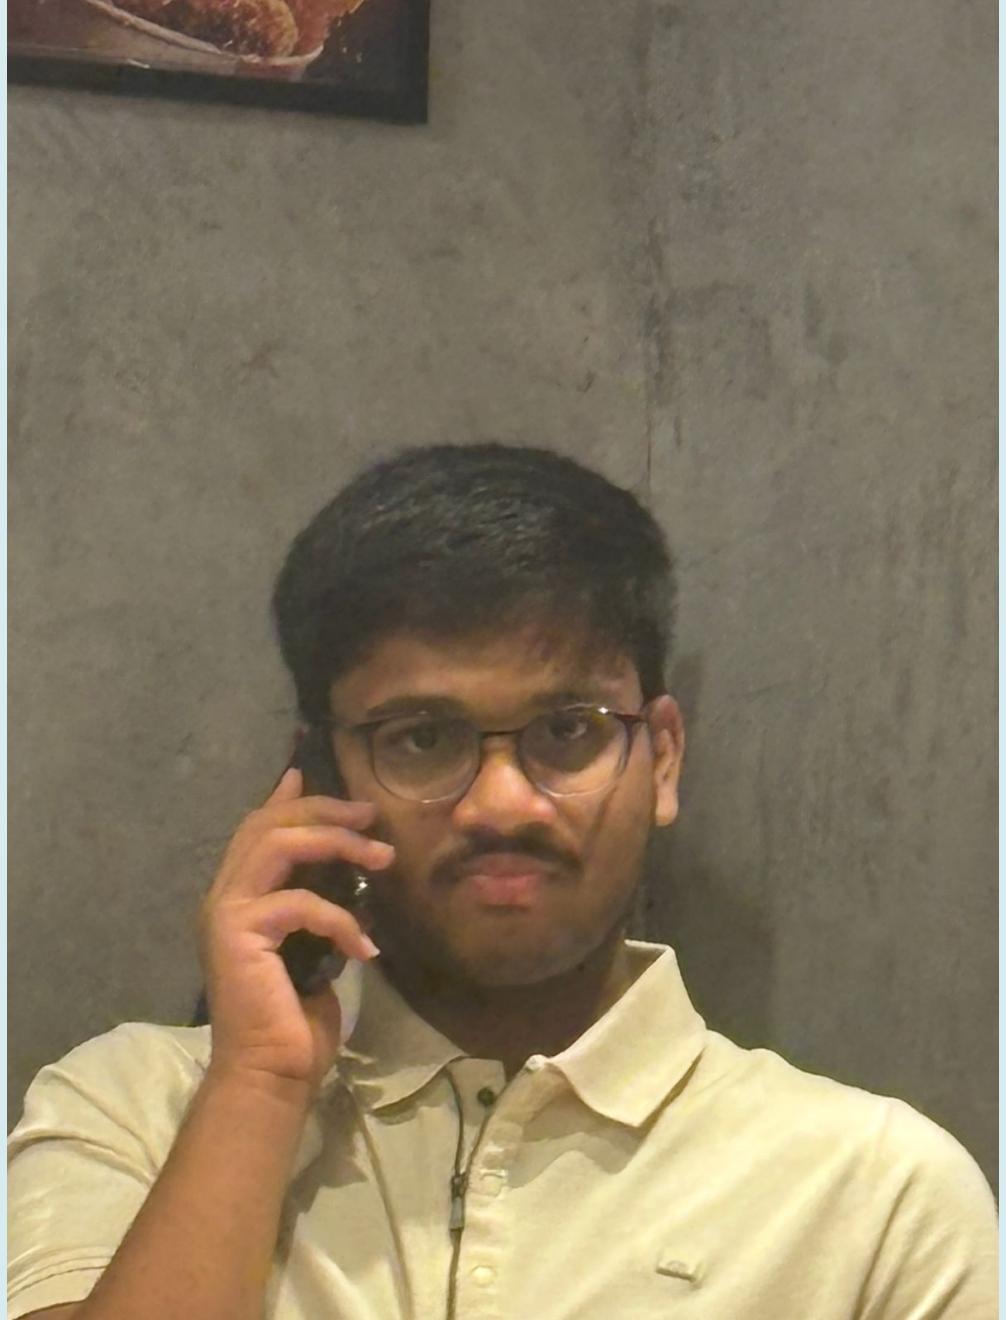

# Smartphones

- Mini-laptops in your pocket
- Emails, calls, project apps, file sharing
- Keeps employees connected anytime
- Many corporates provide official phones

# Video Conferencing

- Zoom, Google Meet, MS Teams
- Connects people across countries instantly
- Saves time & travel costs
- Crucial during COVID → now permanent

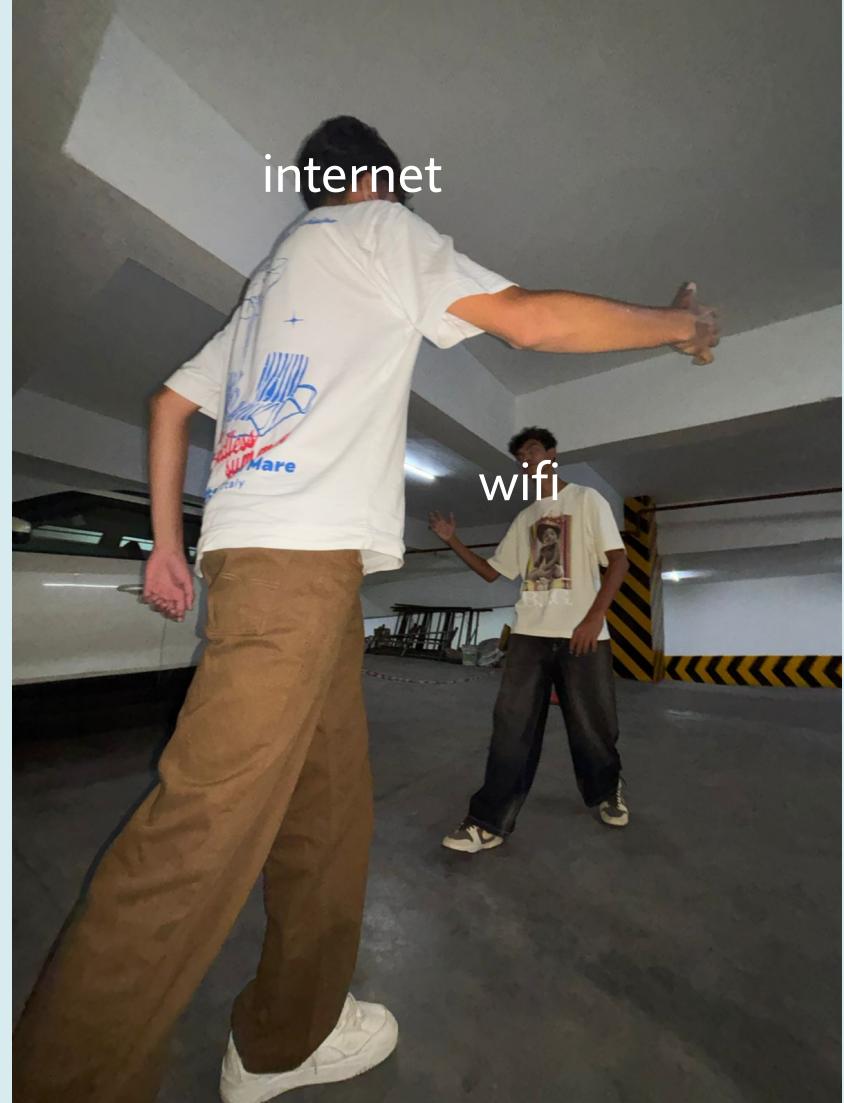

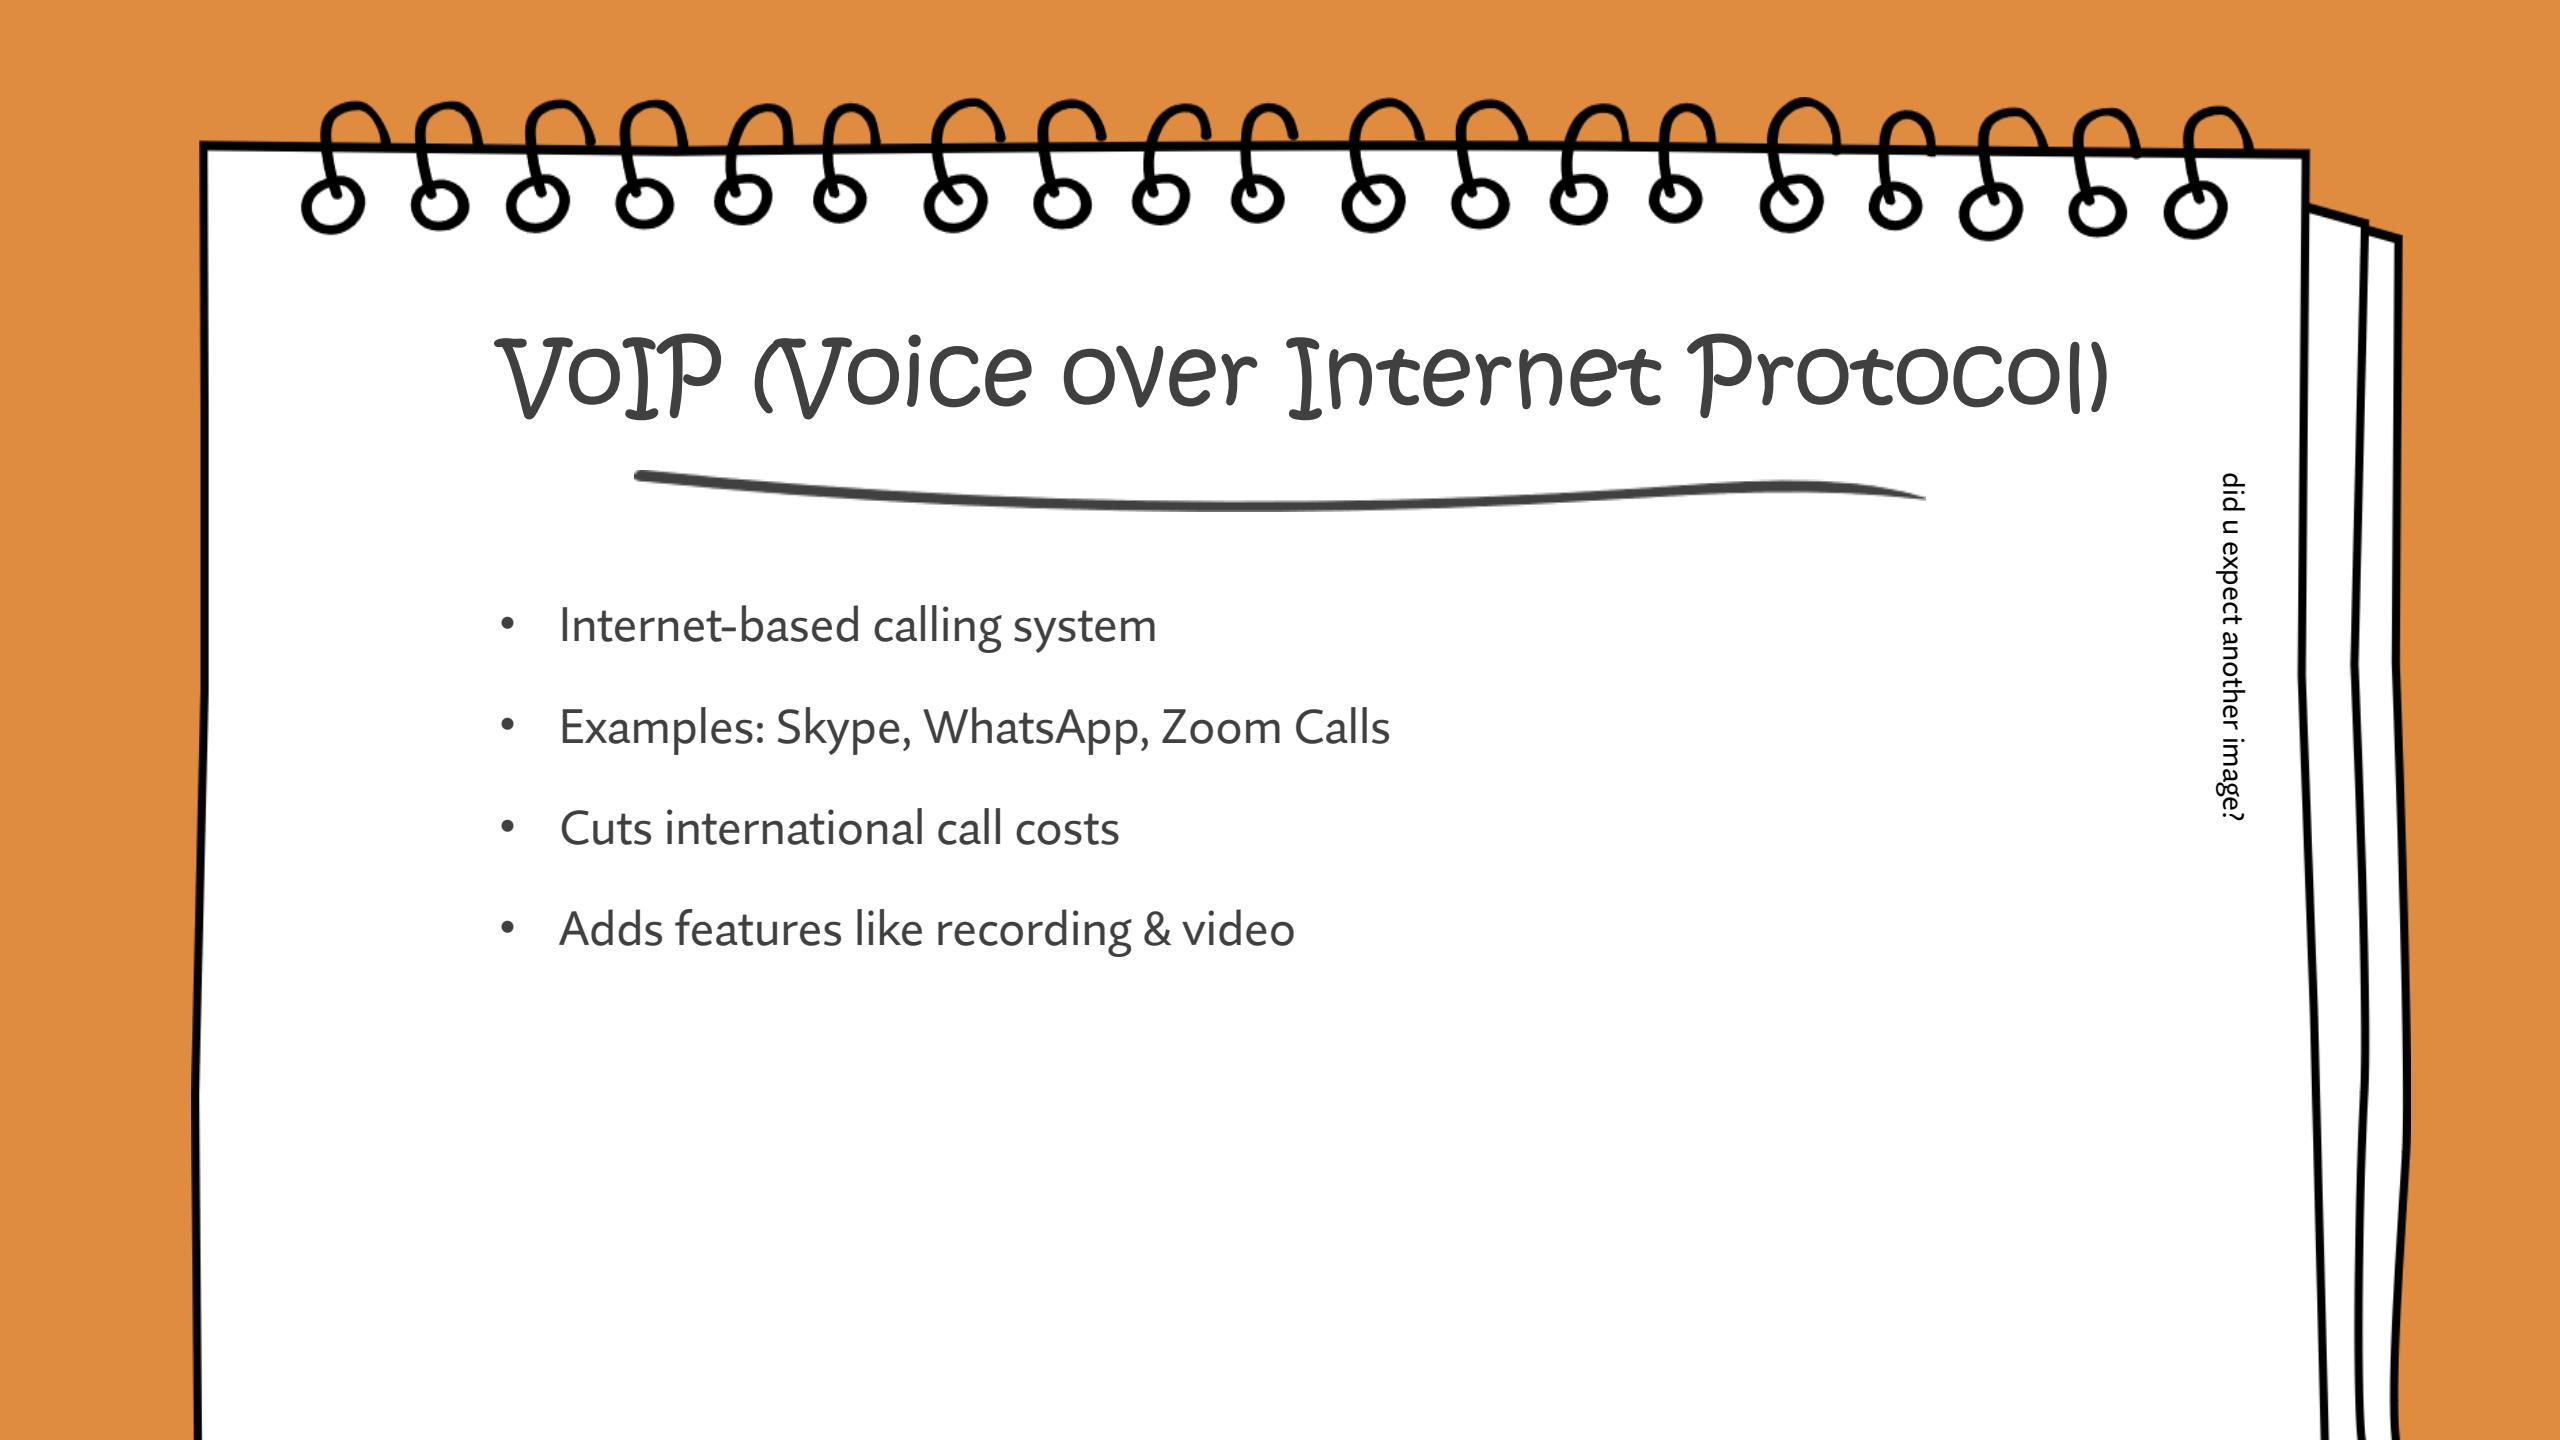

# Intercom

- Instant communication inside office/building
- Saves time vs running around
- Useful in large corporate offices
- Often linked with security systems

# Internet & Wi-Fi

- Lifeline of all modern corporates
- Needed for projects, research & meetings
- Wi-Fi = mobility + teamwork anywhere
- Without internet = work shutdown

# VOIP (Voice over Internet Protocol)

---

- Internet-based calling system
- Examples: Skype, WhatsApp, Zoom Calls
- Cuts international call costs
- Adds features like recording & video

did u expect another image?

## Famous Corporates Using Tools

- TCS → video conferencing globally
- Infosys → laptops & smartphones integration
- Reliance → large-scale digital infrastructure
- Microsoft → Surface devices + Teams software

# Conclusion

- Corporates are powered by the tools they use every day
- Biometric systems keep offices secure
- Photocopiers & scanners manage documents
- LED projectors make ideas visible
- Laptops & smartphones keep employees productive
- Video conferencing, intercom, internet & Wi-Fi, VoIP connect people across the world
- Together, these tools make corporates faster, smarter & more innovative
- The future of corporates = technology-driven growth
